

WINCH counter

The Winch Counter is a device designed to assist the technician operating the winch. It indicates the cable's length when that one is unwinded and the moving speed. Also, it is optionally possible to display the depth of an instrument attached to the cable's end according to the data from another device.

- Indicate the cable's length of -99.9 to 999.9 meters
- Indicate the cable's moving speed of -9.99 à 99.99 meters/second
- Visual and sound indication when a message is coming
- Splash proof polycarbonate box (240 x 160 x 120 mm)
- 3 x 4 digits (18 mm) LCD screen
- 1 x 20 digits (4,75 mm) per 4 lines alphanumeric LCD screen
- Power input 85 to 264 Vac
- Internal permanent memory
- Wheelhouse program software included (Win XP)
